John Deere GATOR Sunshade MOUNTING INSTRUCTIONS

Preparation of GATOR

Note: Left and Right sides of the unit are determined by facing in the direction the machine travels forward.

1. Park GATOR on a level surface. Engage parking brake. Shut off engine.
2. Place (2) two 7/8" ID x 2.25" OD flat washers over the outer row - first and last anti-skid floor holes of the GATOR floor. Center the washers so that they straddle these two holes. The same on each side of the GATOR floor. See Figure 1.

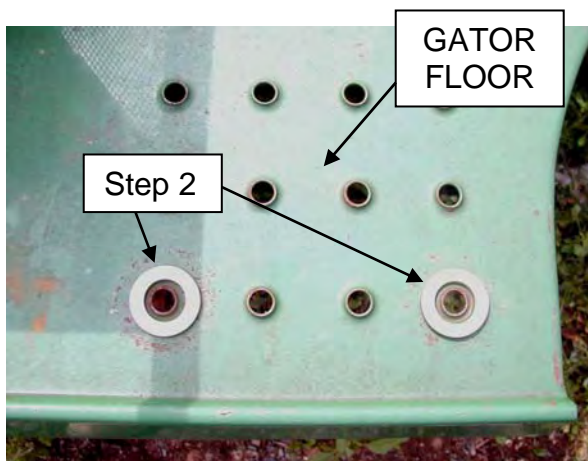

Figure 1

Figure 2

3. For GATORS with a floor mat, roll the floor mat out of the way. Once all fasteners are secured, it may be necessary to trim the floor mat to fit properly around the side frames.

Mounting the Sunshade

4. At the rear of cab, remove (2) M6 x 15mm screws that secure a rear plastic seat cover panel to machine frame. Keep the flat washers in place. See figure 2.
5. Locate the left side frame 2-15999 and right side frame 2-15998. Set each of the side frames onto their respective sides. Align the (2) two holes in each side frame with the (2) two holes in the GATOR floor. Align with the holes in the rear panel mount area.
6. Loosely secure each side frame to the GATOR floor with (2) two 3/8" x 1-1/4" button head cap screws, (4) four 3/8" flat washers, (4) 3/8" extra thick flat washers and (4) four 3/8" lock nuts. The extra thick flat washers are used on the bottom of the GATOR platform. See Figure 3.

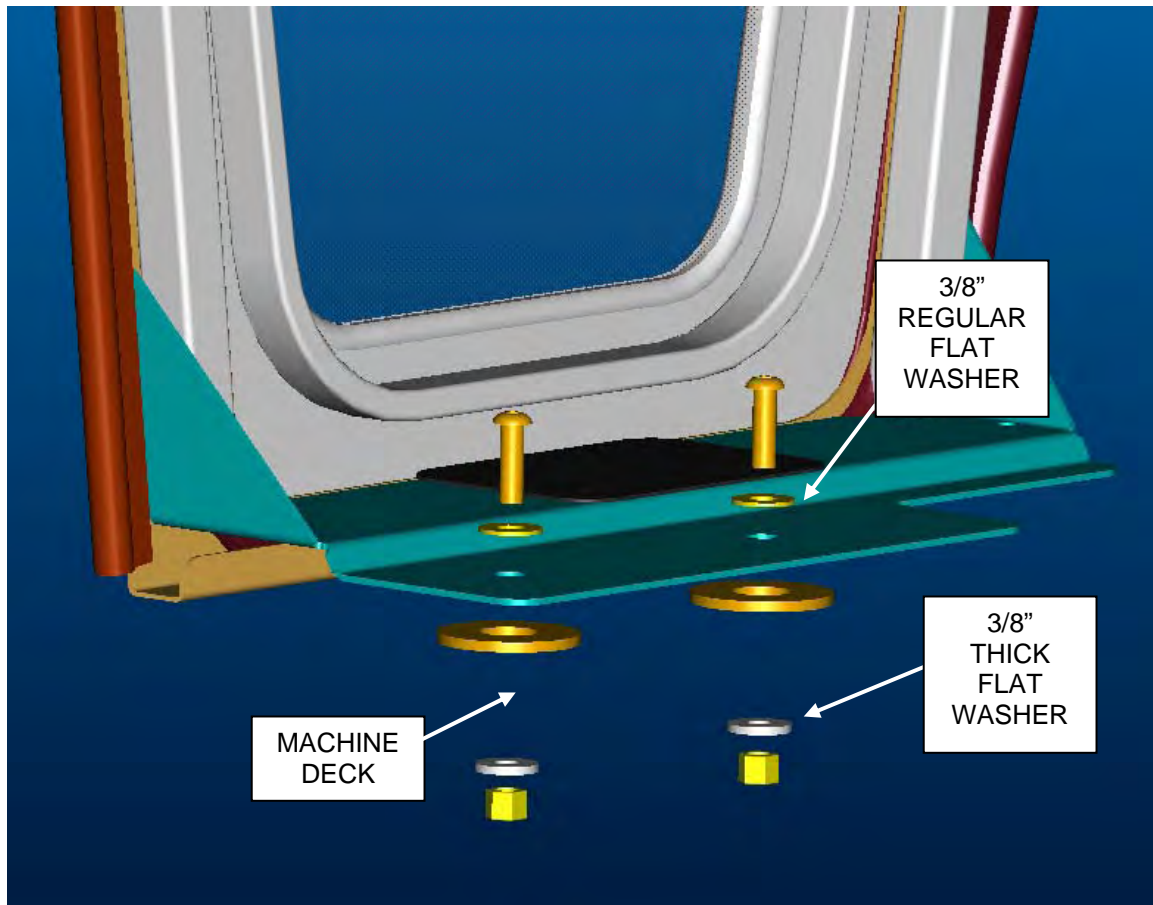

Figure 3

Rear Mounting –All Models

7. Place (2) spacer tubes on top of the flat washers that were securing the rear plastic cover.
8. Install (2) M6 x 35mm screws, (2) 1/4" flat washers and (2) 1/4" lock washers. See Figure 4.

Figure 4

John Deere GATOR Sunshade MOUNTING INSTRUCTIONS

9. Additional rear mount support tubes 1-44145 may be installed on Gator TS and TX models, only. Secure tubes with (4) 5/16-18unc self-tapping flange screws, on each side. See Figure 5.

FIGURE 5

10. Locate the rear upper cross member #2-14668. Secure using (2) two 5/16" self-tapping screws, (2) 5/16" X 1.75" bolts, (2) two 1/4" flat washers and (2) 5/16" serrated nuts. See Figure 6. Torque to 20 ft. lbs. (27 N*m).

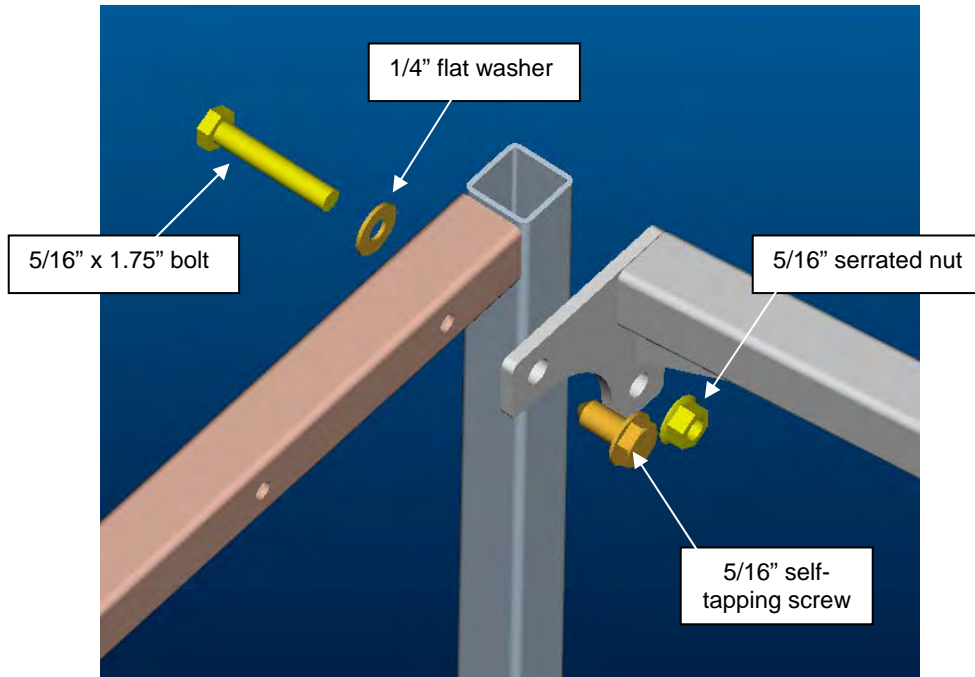

FIGURE 6

11. Attach to the rear side tubes to lower rear panel weldment using (4) 5/16" X 1.75" bolts, (4) two 1/4" flat washers and (4) 5/16" serrated nuts. See figure 7.

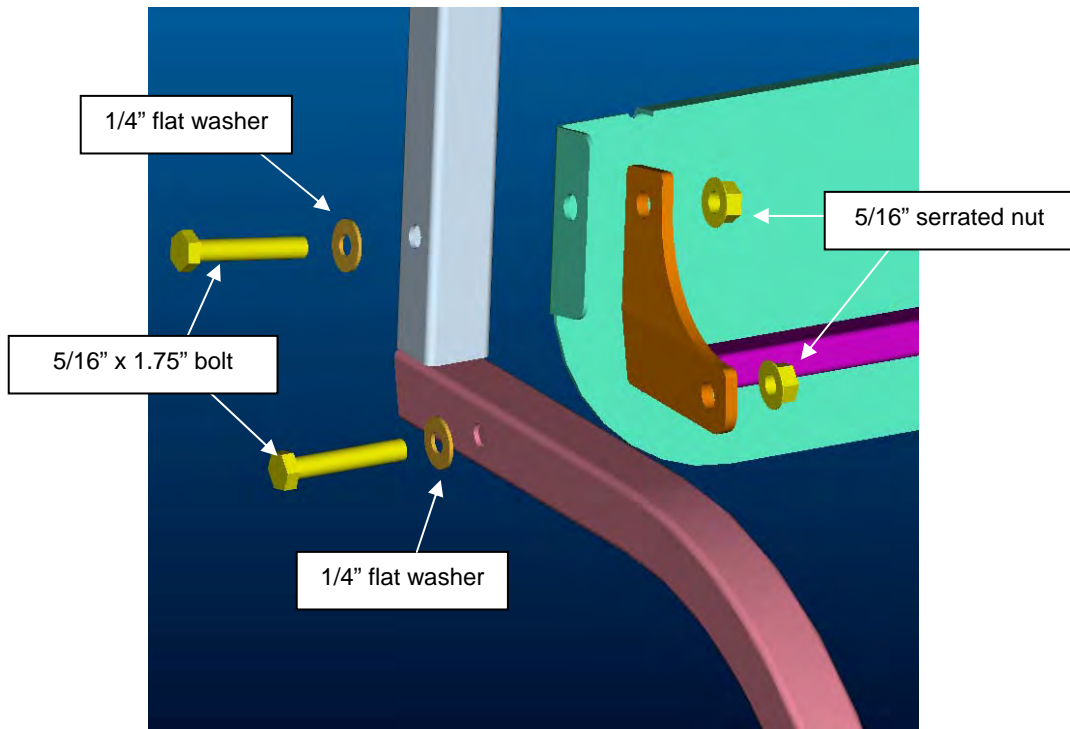

FIGURE 7

John Deere GATOR Sunshade MOUNTING INSTRUCTIONS

12. Install the front windshield assembly 4-14909 over each side frame post. Align the holes and secure with (10) ten 5/16" self-tapping screws. Torque to 20 ft. lbs. (27 N*m). See Figure 8.

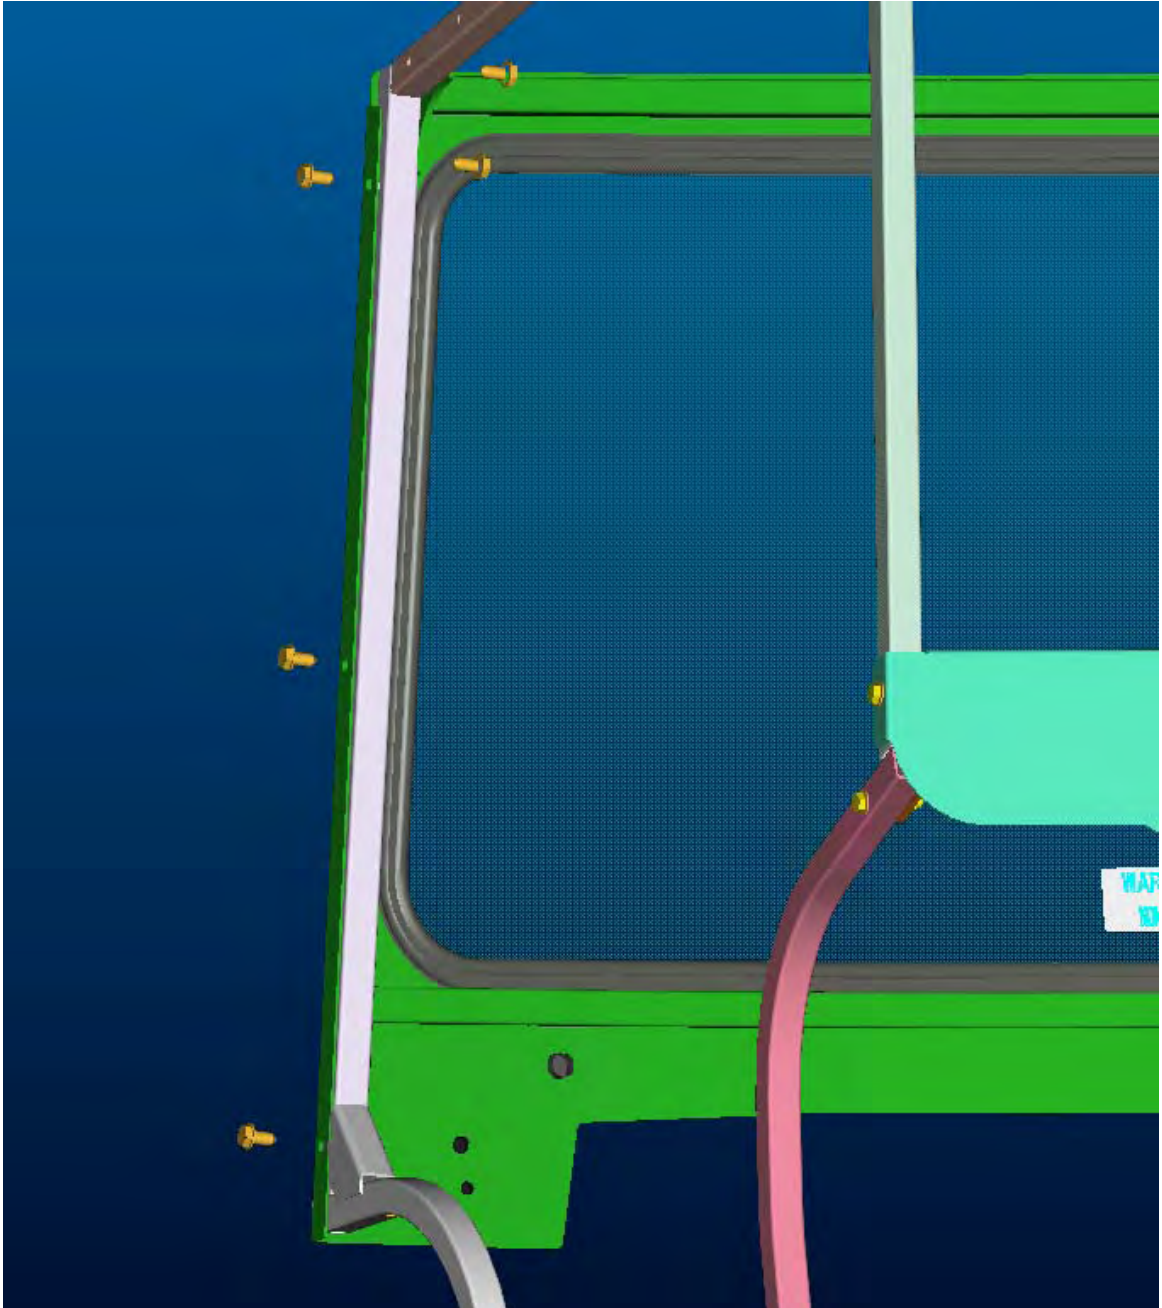

Figure 8
(Step 11)

John Deere GATOR Sunshade MOUNTING INSTRUCTIONS

13. Tighten the floor deck 3/8" fasteners in Figure 3. Torque to 33 lb. ft. (45 N*m).

Mounting the Sunshade Roof

14. Locate (4) four rubber grommets and install them into each hole on the sides of the sunshade roof.
15. Install the sunshade roof with the sloped side toward the front and grommets installed, over the sunshade frame.
16. Align all (4) four roof holes with the side frame holes. Secure at each location using (1) 1/4" x 2.0" long bolts, (3) 1/4" flat washers and (1) 1/4-20 nylock nuts. Make sure one 1/4" flat washer is between the rubber grommets and the upper frame tubes at each connection. Tighten the 1/4" fasteners to slightly compress the rubber grommets. See Figure 9.

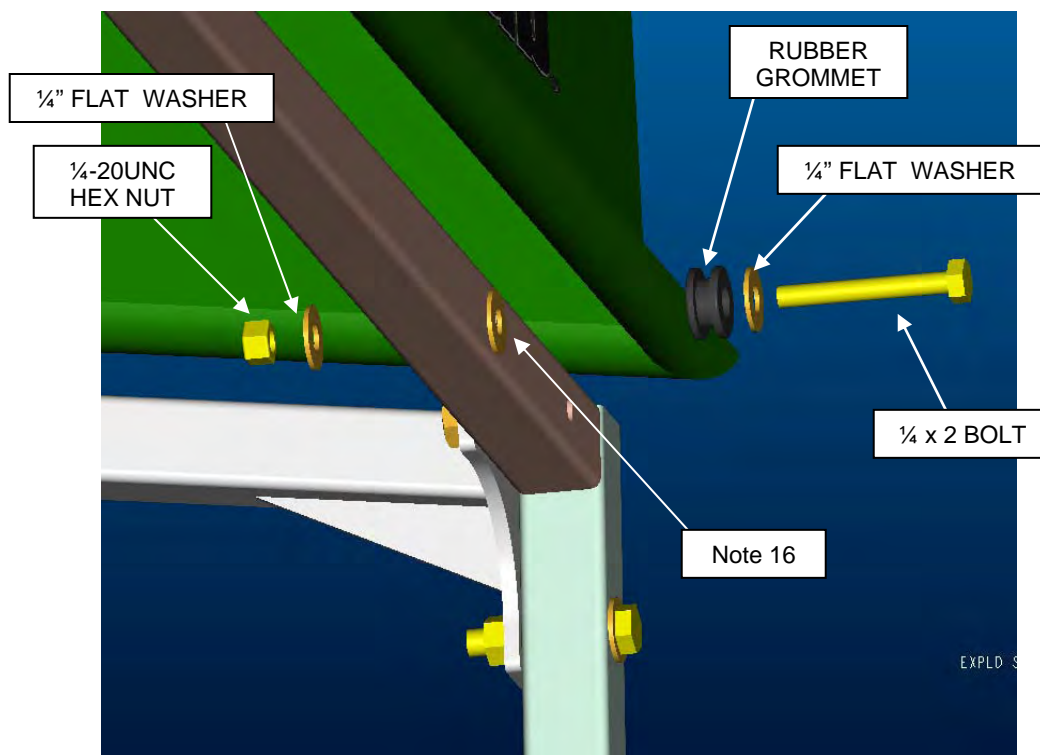

Figure 9
(Steps 14-16)

Fit the floor mat

17. If your GATOR has a floor mat, re-install mat, trim and cut for proper fit. The floor mat will lay unfastened, on top of the side frame base plates.
